

## Release Notes

### Release Summary

Authenion-2.0 version is now generally available. Authenion-2.0 release has new features, bug fixes, security enhancements and updated documentation.

### Features & Enhancements

- Admins can now configure Authenion through the Administrative console. Admins can onboard/manage target Applications, OIDC Providers, Product License and lot more through the administrative console.
- Authenion administrative console is hosted by LikeMinds and is available at [Admin UI](#).
- The logging framework has been changed to Apache Log4j2 from Logback. Audit logging is now available for recording the event occurrence, type, time and responsible user or service.
- Authenion Cluster is available and it provides high-availability & scalability. Authenion has inbuilt load balancer for its backend connections. However, Authenion still requires a network load balancer to automatically balance traffic in the cluster.
- Authenion instance status can be monitored through the console. A health-check endpoint is also available to monitor its status through any monitoring tools.

### Fixes

- |                               |   |
|-------------------------------|---|
| <a href="#">AQ4-2022-1001</a> | <ul style="list-style-type: none"><li>Multiple occurrences of SSO transaction in authenion-engine logs</li></ul>  |
| <a href="#">AQ1-2023-1001</a> | <ul style="list-style-type: none"><li>Authenion engine log recycling and log file size limit to 10MB</li></ul>  |
| <a href="#">AQ1-2023-1002</a> | <ul style="list-style-type: none"><li>REST API calls authorization for Authenion agent</li></ul>  |
| <a href="#">AQ1-2023-1003</a> | <ul style="list-style-type: none"><li>Cookie is configured with SameSite attribute</li></ul>  |
| <a href="#">AQ2-2023-1006</a> | <ul style="list-style-type: none"><li>Multiple sync requests to the same Agent APIs</li></ul>   |
| <a href="#">AQ2-2023-1008</a> | <ul style="list-style-type: none"><li>Header Mapping page shows blank screen when there is no data present in OIDC claims</li></ul>   |
| <a href="#">AQ2-2023-1009</a> | <ul style="list-style-type: none"><li>Enabled Security Headers to Prevent Vulnerabilities - HTTP Response Headers to modify web browsers behavior to avoid security vulnerabilities</li></ul> |
