Doc ID 1001.1 - EIK Pre-deployment Checklist

Create the EIK User in the EBS Database

1.   Create a user (EIKUSER) in the EBS application and assign the UMX|APPS_SCHEMA
     _CONNECT Role.
         Ensure that the user account is configured to never expire.
2.   Validate the username and password of the user by logging into the EBS application.

Networking

1.   Connectivity and firewall rules between the EIK node and Oracle EBS application server
and Oracle Database needs to   be configured in order to allow communication.
2.   Connectivity between EIK and PingFederate runtime nodes (If the EIK is deployed on a
Tomcat or Weblogic application   container)
3.   Ensure that the domain names of the EIK and EBS application are mapped with the same
root domains. If not, create a   CNAME to match the root domain of the EIK and the
EBS application environment

Setting Up the Environment

1.   Ensure that the appropriate Java version is installed (Java JDK 1.8 is the Recommended
Version)
2.   Validate the EIK_HOME Environment variable Pointing to the PingFederate Installation
where the EBSAuth directory is.
3.   Appropriate Read/Write rules are applied to the EIK Deployment and Config files
4.   Validate the EIK license file

Configuration Files

1.   Validate EIKAuth.config file
2.   Validate EIK.dbcx config file
